## CORPORATE SECURITY TRAINING PROGRAMS

Today, corporate executives in the United States are being demonized on social media and by sectors of the news media. Executives and their families are at great risk.

Criminal organizations and political terrorists see great value in targeting corporations and it's executives. American corporations are a symbolic target for terrorists here in the United States, especially while travelling and working internationally.

Corporate kidnap & ransom policies are expensive and are only effective "after" a kidnapping. The best insurance is training that enables the executive and corporate security personnel to deter & avoid a kidnapping or an attack.

All of Gryphon Group's Corporate Security Programs are focused on this type of "insurance":

## Company Profile

Since 2001, we have trained over 35,000 American Warfighters, Special Operations Operators, and Federal Agents. The majority of our clients have been the special forces and military intelligence communities.

These men & women find themselves in highly fluid and unpredictable dangerous environments that are very similar to the circumstances that many law enforcement officers find themselves in on street every-day in the United States.
