- 5-Day Advanced Police Sniper Development Course** - #LEOAPS-0912
 Contrary to conventional wisdom, the Police Sniper often operates in much more difficult circumstances than does the "military sniper" and with significant restraints to their tactical decisions. Police Sniper engagements often involve close-proximity shooting problems on a public street in America, behind a barrier, or in a building involving hostage-takers interacting with civilians while a SWAT take-down team is near or in action against the suspect. In addition to these difficult circumstances, the Police Sniper is heavily involved in "intelligence gathering" as they are acting as "the Eyes of the Command & Control Team". More often than not, the on-scene Police Sniper is not "Green Lighted" to take their shot until the subject has radically deviated in behavior, is in motion, and with little to no warning. Gryphon's Advanced Police Sniper Development Course is strictly focused on what the challenges that the American Police Sniper will encounter during real-world Police actions around the United States.
